Dominic Armento

Professional Summary

Full-stack engineer and startup founder focused on building AI-powered applications, automation systems, and scalable consumer products. Experienced in mobile and web development, OpenAI integrations, rapid product iteration, and cross-functional collaboration with founders, designers, and project managers. Proven track record of shipping products, generating client revenue, and leading early-stage product growth.

Selected Achievements

Multimillion dollar LOI presented for app I codeveloped.
Certified Top 1% Master AI Builder.
Top 20 iOS App Store ranking for app I solo developed.

Experience

NeonLabs — Co-Founder & Full-Stack Engineer

April 2025 — Present

Co-founded a development agency delivering AI-powered applications, automation systems, and custom software solutions.
Generated over \$18K in client revenue through product development and technical consulting engagements.
Built a native Swift full-stack mobile application from architecture to deployment.
Integrated OpenAI APIs into backend infrastructure for an AI-powered hiring platform.
Collaborated directly with founders, project managers, and clients to scope, develop, and launch production-ready applications.

ParentSphere — Founder & Developer

Feb 2025 — Present

Developed an AI-native parenting platform focused on child tracking, AI guidance, and community support tools for parents.
Designed and built the platform's frontend, backend architecture, and AI-assisted features.
Top 20 iOS App Store ranking in the Lifestyle category within the first week of launch.
Led product strategy, feature development, testing, and user feedback implementation.

Maly — Co-Developer

April 2025 — Feb 2026

Partnered with a product manager to transform an early-stage startup concept into a full-stack application.
Iterated through multiple beta testing cycles to improve product functionality and user experience.
Contributed to product development efforts supporting a reported \$3.5M letter of intent (LOI) from a family office.

Ancient Warriors NFT — Community Growth Specialist

March 2021 — Sep 2022

Led community outreach and engagement initiatives within a Web3 startup environment.
Grew the project community by over 100 members through strategic engagement and relationship-building.
Worked closely with founders and contributors to strengthen community retention and visibility.
